

Harbour Energy plc
Dunnottar exploration well result
30 December 2021

Harbour Energy has completed the drilling of the Dunnottar exploration well (30/8-4) in licence P2399 in the UK North Sea.

The well reached a total measured depth of 15,639 feet encountering hydrocarbon-bearing intervals in the Palaeocene, Jurassic and Triassic. The commerciality of these marginal accumulations will be assessed. In the meantime, the well will be plugged and abandoned.
